GEORGIA

Georgia Farm Gate Value Report 2017

Compiled and published by The University of Georgia
Center for Agribusiness & Economic Development

AR-18-01
November 2018

Acknowledgements

Special thanks to the Office of Information Technology, College of Agricultural and Environmental Sciences, for the support and maintenance of the Farm Gate database and Web site.

We appreciate the work of the Georgia Cooperative Extension Specialists who were consulted in the process of organizing this report along with the Georgia Cooperative Extension Agents and the Program Development Coordinators who provided information for the Farm Gate Value Report.

A Comparison of Agricultural Data Sources

In addition to the Farm Gate Value Report (FGVR), users of agricultural data in the state of Georgia have had a variety of available resources including National Agricultural Statistics Service (NASS), and The Census of Agriculture (Census). Historically, the Georgia National Agricultural Statistics Service has published Ag Facts annually. However, the Georgia Agricultural Facts was discontinued after the 2009 issue due to budget and resource cuts. The Georgia Agricultural Statistics Service continues to publish much of the information and post it to their website, but Ag Facts is not available in the previous format. The Census is produced every five years by the United States Department of Agriculture. Georgia Cooperative Extension compiles the FGVR typically each spring to capture the prior year's information. Since each of these reports measure different variables in different ways, it is likely that numbers taken from one report will not exactly match those from another report for similar commodities.

The FGVR relies exclusively on Cooperative Extension personnel to provide production information. Each year a survey is distributed to each county Extension office for completion by the county agent. For crops, individual agents are asked to supply county acreage and yields. A suggested price for each crop (determined by Extension specialists) is provided. The price for crops includes an adjustment for all government payments directly associated with the production of the crop and should provide a better indication of the value of the crop. Individual agents have the option of adjusting the price based on county conditions. Agents are also provided acreage data from the Farm Service Agency (FSA). This data is available for row crops, fruits and nuts, and vegetables. For livestock, inventory numbers are requested and a formula is then applied to calculate average production for the year and value of production for the county.

Although NASS also reports annual data, the types of data and sources differ from the FGVR. FGVR focuses only on value of production data, not all of NASS data is value of production. For some commodities, most notably livestock, sales or cash receipts are used instead. Cash receipts measure the value of marketings for the year, regardless of the year in which the commodity was produced. Another difference between the FGVR and NASS is that the FGVR has county-level value of production data for all of its commodities. Finally, the FGVR contains some commodities which are unavailable through NASS.
